

10 Ways Vision:CHC Dashboard's Intelligent Reporting Can Help Your Health Center

1. **Your CFO spends hours manually pulling data from several sources to create spreadsheets.**
 Vision:CHC Dashboard automatically combines data from multiple sources and generates ready to use, analyzed information for the entire revenue cycle.

2. **Everyone is working with a different report that's been tweaked "just a little bit."**
 Vision:CHC Dashboard provides a single source version of current, error free information.

3. **Distributing reports is time-consuming.**
 Our report subscriptions allow you to set up a schedule once and the system will automatically email any number of reports whenever you wish.

4. **Managers and executives have to sift through pages of reports to find which areas need immediate attention.**
 Let Vision:CHC Dashboard do the work for you. Our decision support scorecard organizes your data based on performance and immediately provides an overview of areas that could be problematic.

5. **Analyzing spreadsheets leaves less time for actually managing.**
 Our reports are pre-calculated and deliver analyzed information in an "at a glance" format. Simply by checking their dashboards for a few minutes each day, everyone in your practice has the information they need, on-line, anytime.

6. **Your IT department is overwhelmed with report requests.**
 Reports are pre-built and just a click away. Our team of programmers is always available to create reports to your specifications.

7. **Reports are based on data that is weeks or even months old.**
 With Vision:CHC Dashboard, your data is always current and updated daily.

8. **Running reports requires system training and expertise.**
 Vision:CHC Dashboard requires almost no training; everything is done for you. The system is all point-and-click, very intuitive and users are normally up and running within an hour.

9. **Everyone is suffering from information overload.**
 Vision:CHC Dashboard's are user-defined, and provide the right information, at the right time, to the right people:

- Physicians can receive automatic email reports for performance initiatives
- Managers can track monthly goals.
- Executives can monitor the progress of strategic initiatives enterprise-wide and drill through to detail.
- Presentations are easily created from our reports for "C"-level staff and Board Members.

10. **Some PM Vendors use the "dashboards" bullet for marketing purposes but actually provide dashboards that may simply be graphical interpretations of the operational reports or workflow task lists.**
 Only a data warehouse can provide true Business Intelligence (BI) Analysis Reports, BPM with an OLAP model and the ability to perform ad-hoc analysis. Vision:CHC Dashboard delivers enterprise wide BI with historical trending, projections, OLAP tools and Key Performance Indicator (KPI) Benchmarking.
