

***Vision:CHC* Electronic Health Records**

Designed by Physicians for Community-based Clinics and Public Health Departments

Vision:CHC EHR feels natural to community-based clinicians because it was designed by physicians with experience managing community clinics. Its dynamic templates allow clinicians to quickly create encounter notes for patients receiving services under a variety of public health programs. Real-time query and dashboards simplify chart reviews and compliance tracking for Meaningful Use, PCMH, and PQRS. *Vision:CHC* also interfaces with Immunization Registries, Communicable Disease Registries, and Health Information Exchanges.

Vision:CHC EHR Dashboards display Meaningful Use and Patient-centered Medical Home data real-time for both the patient and the entire clinic. Therefore, clinical and administrative staffs do not need to compile Meaningful Use, Medicaid, and PCMH statistics and reports. The integral efficiency of *Vision:CHC* means a reduction of hundreds and even thousands of hours spent in administrative time, which can be devoted to patient care.

Most importantly, *Vision:CHC* EHR facilitates the delivery of quality care to a clinic's patients and to the larger community.

Core Features

- Integrated clinical, operational, and financial information
- Patient progress tracking and reporting by specific public health program
- Real-time Meaningful Use and PCMH Dashboards show compliance levels for individual patients and the Clinic
- State and Federal clinical and financial reporting
- Interfaces with immunization and communicable disease registries
- Connectivity with Health Information Exchange
- Customizable Quality Care reminder and tracking system
- Fast, easy documentation – all on one screen
- Certified for Meaningful Use and PQRS
- Customizable Dashboard shows Outstanding Work List
- Electronic prescribing with drug-interaction and allergy alerts
- Patient portal for online communication between patients and Clinic

***Vision:CHC* Practice Management**

Operational and Financial Management for Public Health Departments

The core of *Vision:CHC* Practice Management is clinical, operational, financial, and reporting unique to community-based clinics and public health departments that provide care to the underserved. Features include:

- Medicaid and Medicare billing
- Claim management and eligibility verification
- Automatic sliding fee calculation
- State Medicaid reporting, updated annually
- Centralized medical and dental billing and accounts receivable
- Grant and program tracking and reporting
- Customizable management and operational dashboards
- Drill-down reports to show performance against goals
- Integrated clinical and operational appointment scheduling
- Automatic report schedule and delivery

***Vision:CHC* Management Reports and Dashboards**

***Vision:CHC* Management Reports fully address the unique reporting and information needs of public health departments and community-based clinics.**

One of a health department's most important assets is its data. *Vision:CHC* captures important data during patient registration, scheduling, clinical documentation, and billing. An outstanding value of *Vision:CHC* is its ability to access this data in a form that can be used for decision-making, program tracking, grant applications, and mandated reporting.

Vision:CHC includes a reporting tool that is easy to use and can access all of *Vision:CHC*'s data elements. Among the key features of *Vision:CHC* Reporting are:

- A Report catalog with more than 200 reports designed exclusively for community and public health.
- A full set of Medicaid reports updated annually and ready to run.
- Aggregate reports specifically designed for Meaningful Use, disease and Immunization Registries, and Health Information Exchanges.
- An end-user report generator designed for grant and ad hoc report writing.
- All reports reside on the server for easy access and retrieval.
- All data are ODBC-compliant and can be exported in many standard formats
